modular system

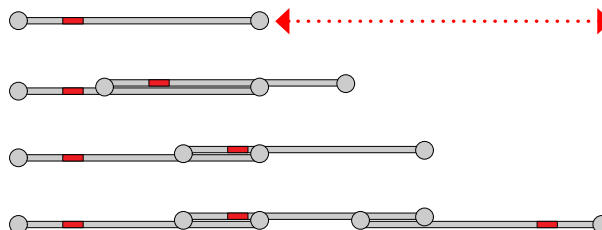

STOCS<sup>®</sup>

connect at any point

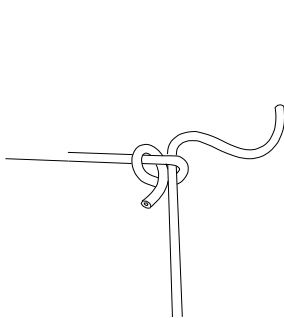

connect at any angle

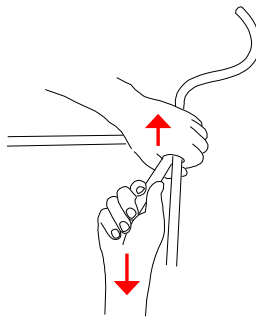

STOCS are resizable. Double or triple the length of STOCS by tying them together. They always fit.

## how to make the knots?

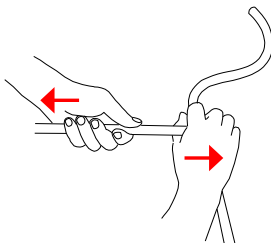

**STOCS<sup>®</sup>**

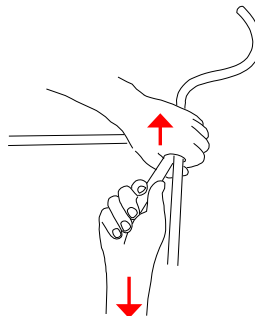

1

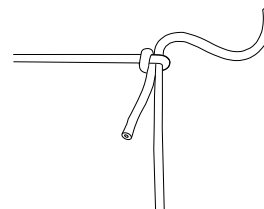

2

3

4

5

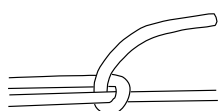

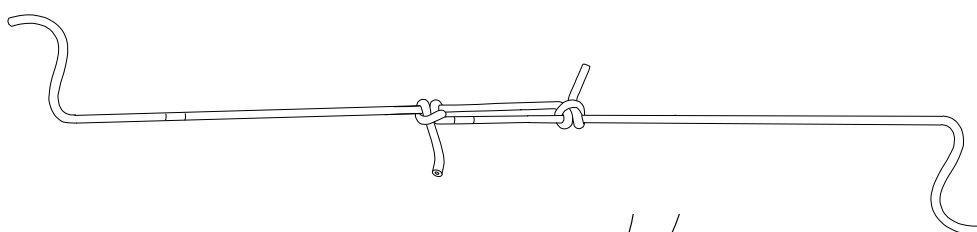

With the "half hitch"-knot you can make almost everything.

Connect a flexible end to the rigid part of another STOCS.

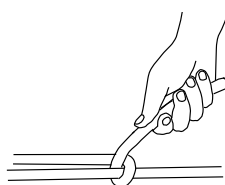

Pull tightly!

extra length

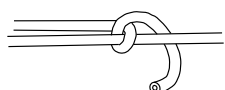

STOCS<sup>®</sup>

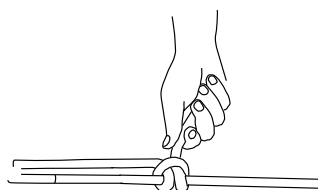

1

2

3

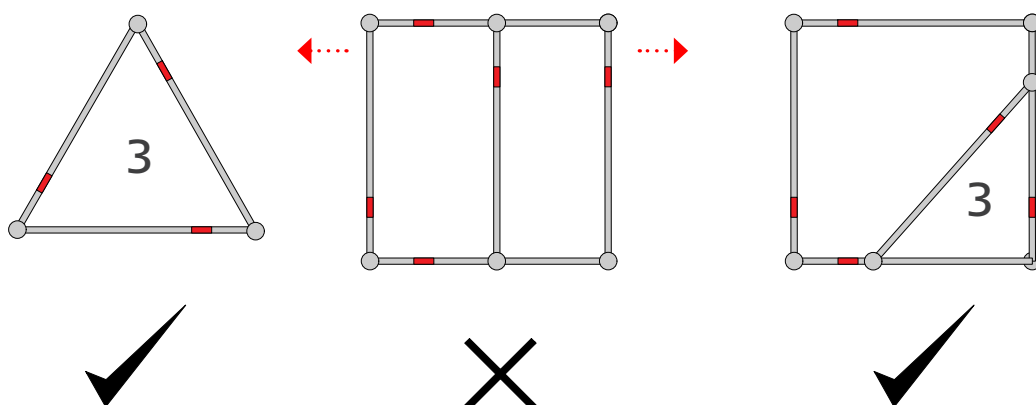

4

If you need a longer STOCS you can extend it in a clever way. You can make every length you need.

stability

STOCS<sup>®</sup>

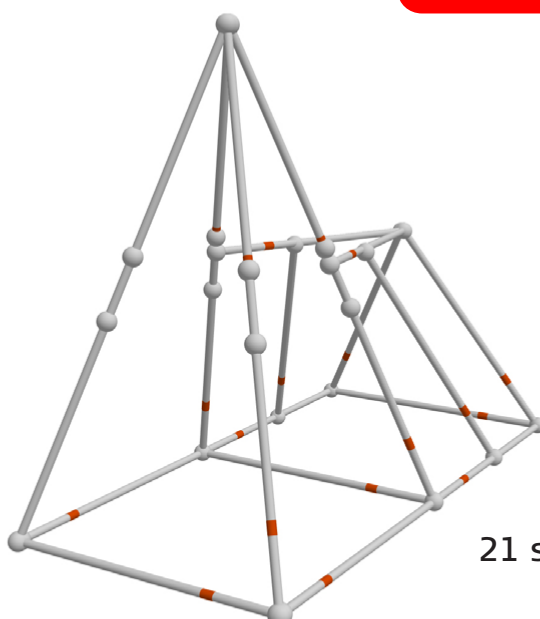

Structures should be firm and stable. Squares are not stable.  
Triangles are.
