## knopen en bouwvoorbeelden

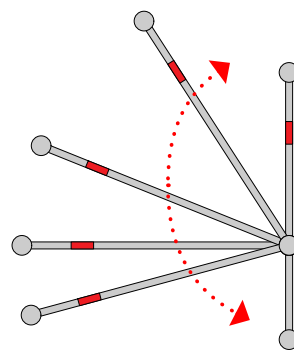

moeilijkheids graad

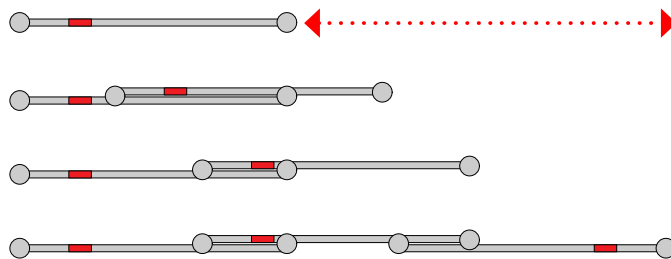

# bouwsysteem

Je kunt STOCS overal vastknopen.

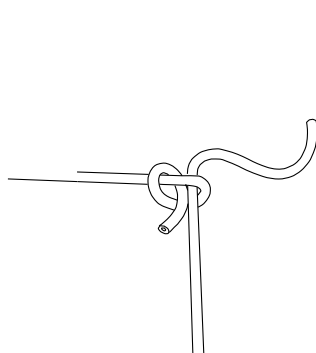

onder elke hoek

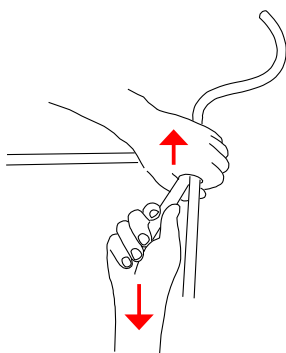

STOCS zijn te verlengen en op maat te maken. Door twee of meer STOCS zo aan elkaar te knopen.

## hoe maak je de knopen?

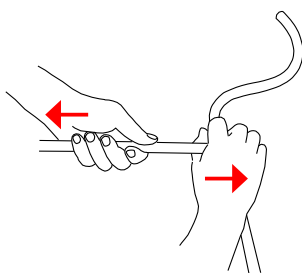

STOCS<sup>®</sup>

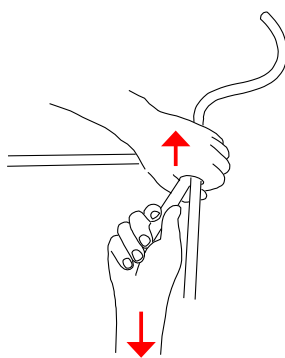

1

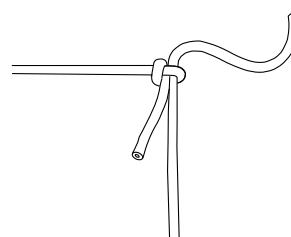

2

3

4

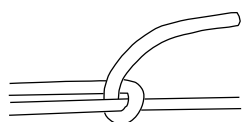

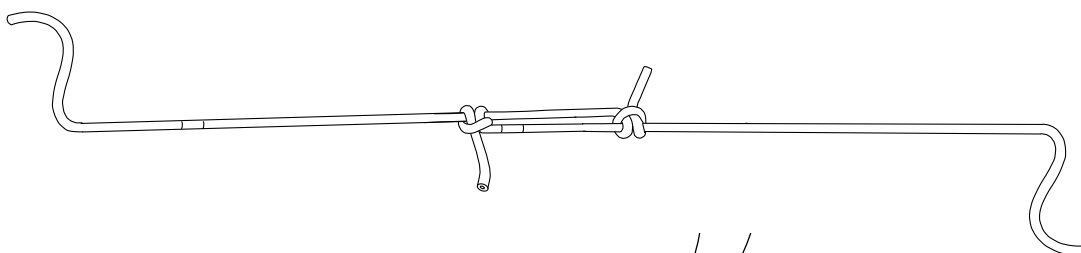

5

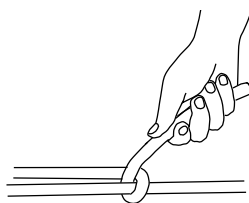

Met deze knoop, "de halve steek", kun je alles maken.  
Knoop het flexibele uiteinde aan het stevige deel van een andere STOCS.

Trek de knopen goed aan:  
"uiteinde - stevige deel - uiteinde"

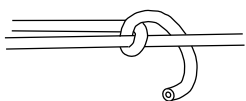

# verlengen

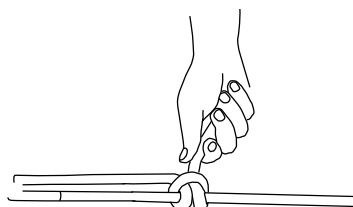

1

2

3

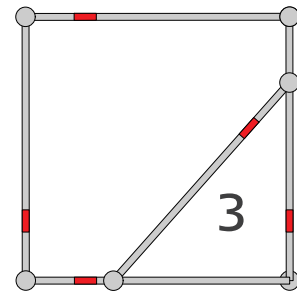

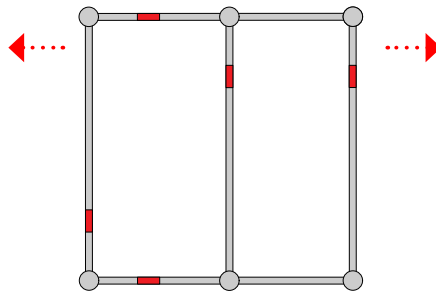

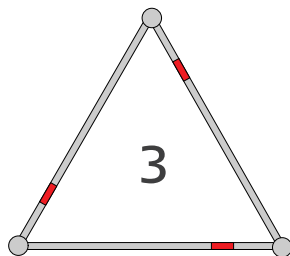

4

Als je een langere STOCS nodig hebt, knoop er dan twee of meer zo aan elkaar. Je kunt zo de lengte maken die je nodig hebt.

stabiliteit

STOCS<sup>®</sup>

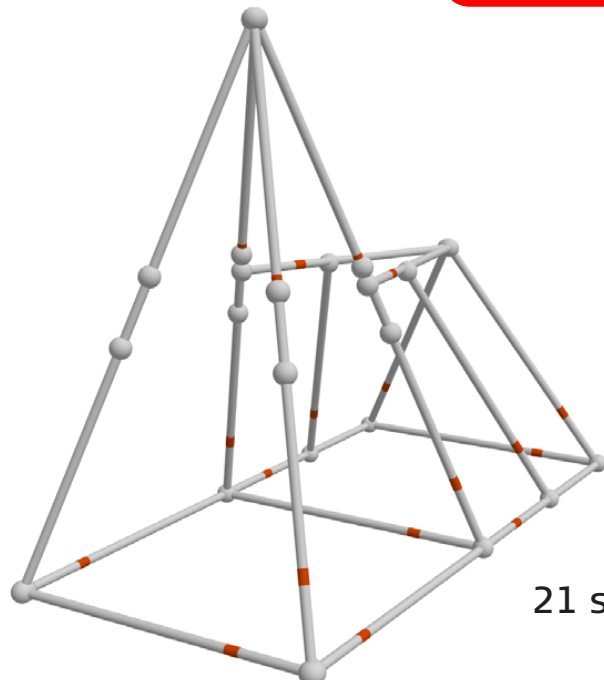

Bouwwerken moeten stevig zijn. Driehoeken zijn stevig. Een vierkant of rechthoek wiebelt. Die maak je stevig door er een driehoek in te knopen.
